"A"	17"	12"	11"	10 1/2"	9"	7 3/4"	5 1/2"
"B"	10 1/2"	7 1/4"	7"	6"	5 1/4"	4 1/4"	3"

How to Measure

"A" Measurement: This measurement is the total length of the splint. Using a flexible tape measure, begin by placing it under the animals foot and measuring from the longest toe nail extending up the back of limb to mid-forearm. (Place the limb as if the animal were in a standing position.)

Note: The splint will not extend up and over the elbow

"B" Measurement: This measurement is taken from the Carpal Pad (at the wrist) down the back of the limb and under the foot to the longest toenail. (Place the limb as if the animal were in a standing position.)

Our Splints are a "Generically Made Splint" and will not fit to every contour of the animals leg. But can be heat moulded Please contact us if you have any questions on sizing or the fit of these splints.

*The XX-Large Size splint is a custom made item. These are fabricated individually. Please allow 5-7 extra business days for shipping on this size.
